Jim Panulla  
Milestone Scientific, Inc.  
220 S. Orange Avenue  
Livingston, NJ 07039

Dear Jim,

After recently purchasing my fourth system from Milestone, I thought I should write a testimonial about how much I, and my patients, enjoy the "Wand". I have one in every one of my operatories and I would not be without them. Now called the Compudent, the newest model has a third speed option, turbo speed.

I limit my practice to endodontics and using the wand has helped immensely with the patient fear of having a root canal. Let's face it, most patients don't like the dentist because of the "needle" and if they don't feel that then the rest of the procedure goes smoothly. Many patients actually fall asleep in the chair because they are so relaxed which is the biggest compliment. Patients do not feel the injections and because of the speed of delivery of this system, I have not experienced any syncope.

The units are very easy to maintain and Milestone is quick to respond with any questions you might have. Jim, you have been very helpful and attentive.

I have been extremely happy with all the units I have and feel they are a great asset to my practice. I highly recommend this system to all my colleagues.

Sincerely,

A handwritten signature in cursive script, appearing to read "Orlando A. Marra".

Orlando A. Marra D.D.S.
