Subject The Wand STA

Brian

Just wanted to let you know how thrilled we are as a practice with The Wand STA.

We are confidently quoting that we are a **syringe free practice** and offer all types of procedures using The Wand STA. We have removed surgically compromised teeth and have even placed implants. We do cosmetic makeovers- multiple crown preparations and patients are so happy without having to endure the numb feeling for most of their day. We also use it for conventional fillings and if the patient is really sensitive we offer it for hygiene appointments.

Patient confidence has grown so much we now have two!

All our dentists and our therapist are fully trained using this technique- it really is a magic wand!

Many thanks for the link info re www.painfreedentistry.uk.com and for referring patients our way- I look forward to meeting you at the BDTA.

Kind regards

Mandy
